CoreIntegrator|3.0[®] debuts at Microsoft[®] Convergence, Atlanta

May 10, 2010, Lewisburg, PA

Computer Support Services, Inc. (CSSI[®]) introduced CoreIntegrator[®] |3.0 to expo attendees and Microsoft professionals at Microsoft Convergence in Atlanta. Convergence is the annual Microsoft event for Microsoft Dynamics partners and customers and this year attracted over 8,000 attendees to learn about Microsoft Dynamics ERP software and third party products that are available to enhance productivity and financial reporting processes.

CSSI, a Microsoft Gold partner, unveiled CoreIntegrator|3.0 at booth 1326 to rave reviews. According to Tom Erickson, CSSI Corporate President, "This is the most excitement that I have seen for a new product in years." The new release of CoreIntegrator |3.0 builds on its industry leading predecessors and includes complete integration to Microsoft SharePoint as well as a new visual workflow designer, web-based user interface and a real-time task notification system. In Atlanta, CSSI demonstrated CoreIntegrator|3.0 working as a Dynamics GP Accounts Payable processing and approval system but the product is designed to meet a full range of both Dynamics integrated processes and stand-alone workflows.

First introduced in 2001 as a basic document management system designed to help electronically processed documents through Microsoft Dynamics ERP systems, CoreIntegrator|3.0 has evolved into a feature-rich process and approval management system. With ReadSoft Invoice[®] sophisticated document-scanning technology at the front-end, and either Microsoft SharePoint or EMC[®] ApplicationXtender as the central repository, CoreIntegrator provides a full solution to workflow and document storage. CoreIntegrator|3.0 will solidify CSSI's position as one of the market leaders providing customizable workflow and document processing solutions.

Visitors to the CoreIntegrator|3.0 booth included existing and potential customers who were excited about the new features and the opportunity to learn how CoreIntegrator|3.0 can help to enhance productivity and reduce transaction costs. Arch Insurance, a corporation with global operations, has been a CoreIntegrator customer since the first version. Philip Narciso of Arch Insurance, said, "CoreIntegrator makes my world smaller, and that's a good thing." It allows his company to correspond on critical issues across the globe on a timely basis saving his company and staff both time and money. Narciso is looking forward to being one of the first adopters of CoreIntegrator|3.0 to expand the workflow capabilities throughout his organization at the international level.

Coinciding with the debut of CoreIntegrator|3.0 was the unveiling of CoreIntegrator's new website – www.coreintegrator.com. The website provides timely information about the software and opportunities to schedule demos and download product information. CSSI is planning CoreIntegrator|3.0 installations to begin in Q3 of 2010...

For information about CoreIntegrator|3.0 call CSSI or visit www.coreintegrator.com.
