ReadSoft adds CSSI to North American Partner Network for Microsoft Great Plains integration

ReadSoft US signs partner agreement with Computer Support Services, Inc. (CSSI), developer of GPx, as a reseller and joint collaborator in the Great Plains market. This collaboration targets the 27,500 small- to medium-sized businesses with installations of Microsoft Great Plains financial software.

CSSI recently developed GPx, the product that ties accounting package Microsoft Great Plains with Documentum ApplicationXtender, a leading content management solution. Through GPx, a user can attach any content—scanned documents, spreadsheet files, emails, and so on—to specific transactions inside of Great Plains. ReadSoft's INVOICES will allow CSSI to create and offer a fully integrated solution with automated front-end capture.

"CSSI has designed its core integrator technology to embed content management applications within other enterprise applications," said Tom Erickson, Vice President of CSSI. "Integrating ReadSoft's INVOICES software to capture data directly from paper into Great Plains adds to CSSI's integrity and value as a business technology consulting company."

"Working with reselling partners such as CSSI, who possess a vertical strength in such a growing marketplace, provides customers the fully integrated solution of automated data capture, content management and integration to Great Plains software," said Bob Fresneda, President of ReadSoft US. "CSSI and ReadSoft have collaborated on a business plan of working with partners to help solve more of the Great Plains users' capture and content management needs."

About CSSI:

Founded in 1973, Computer Support Services, Inc (CSSI), is a business technology consulting company based in rural Pennsylvania (www.cssi-pa.com). With corporate headquarters in Lewisburg, and a satellite office in Camp Hill, CSSI started in Document Imaging in the mid-1990s. CSSI's sales in Document Imaging and Content Management paralleled the growth of the Content Management industry: it was slow-going for years. However, with the introduction of GPx, CSSI has seen a meteoric increase in inquiries from Great Plains users.

About ReadSoft:

ReadSoft is the global leader in the development and sales of a complete product platform for Document Automation. With thousands of customers on a global basis, ReadSoft supports customers and partners in the United States with offices in 7 locations, including the corporate headquarters in New Orleans, LA.

Established in 1991, ReadSoft, first with free form technology for invoices and color document processing, has become the global technology leader, with subsidiaries in 11 countries and partners in an additional 70. We are proud to have the largest and most innovative development department in the industry, with professional services to assist customers and partners on a global basis. ReadSoft's vision is to free businesses everywhere from manual document handling. For more information please visit www.readsoft.net.
